

Googlimon - Concept Guide

Storyline

The world of Googlia is powered by The Index, a mysterious network connecting every city, device, Googlimon, and human. Strange glitches begin appearing, routes become corrupted, and Googlimon evolve incorrectly. The player begins in Cache Town, receives a starter from Professor Search, battles Team Malware, defeats eight Googligyms, and ultimately uncovers the truth behind The Algorithm.

Map Structure

Region: Googlia. Major locations include Cache Town, Searchburg, Browser Bay, Streamport, Cloud City, Firewall Falls, Pixel Peak, Quantum Heights, Nexus Central, The Datacenter (Elite Four), and postgame area The Deep Web.

Types

Search, Browser, Cloud, Data, Media, AI, Security, Gaming, Social, Hardware, Electric, Virus, Quantum, Cosmic.

Starters

Querycub (Search), Puffbit (Cloud), Thinklet (AI). Each evolves into a three-stage line.

Sample Googlidex Families

Querycub → Searchound → Indexwolf. Scoutgle → Seekrow → Findrake. Tabbie → Hoplink → Portalope. Chromunk → Cacheunk → Megachrome. Puffbit → Nimbusheep → Cloudram. Thinklet → Cognibot → Mindframe. Additional families include Social, Gaming, Security, Data, AI, Media, and Hardware lines through #060, with expansion planned to #150.

Googligyms

1. Searchburg - Scout Searcher (Search) 2. Browser Bay - Tabitha (Browser) 3. Streamport - Liv (Media) 4. Cloud City - Nimbus (Cloud) 5. Firewall Falls - Cipher (Security) 6. Pixel Peak - Player One (Gaming) 7. Quantum Heights - Dr. Prompt (AI) 8. Nexus Central - Nexus (Mixed Team)

Elite Four & Champion

Elite Four: Cache, Firewall, Vector, Oracle. Champion: Algorithm Prime using Indexwolf, Cloudram, Mindframe, Forticode, Gamezard, and Omnimind.

Legendary Googlimon

Googlex (Search/Cosmic), Algorithmon (AI/Cosmic), Cacheos (Data/Cosmic), Nullbyte (Virus/Cosmic).

Additional Systems

Googliballs, App-based HM replacements, Indexed Forms (battle gimmick), postgame Deep Web region, and future expansion from #151-200.
